

# Call for Papers

## The Future of Artificial Intelligence (AI) in the Army

Artificial intelligence (AI) technology is rapidly permeating many aspects of our society. But how should the U.S. military use AI to maintain an edge over our near-peer competitors as they race to develop AI applications that will give them an edge in a war with the United States? *Military Review* is soliciting papers for a special edition regarding military applications of AI and its future in the Army. Potential topics include the following:

- ◆ AI support to the warfighting functions
  - ◆ C2, operations planning
  - ◆ Movement and maneuver
  - ◆ Intelligence collection and processing
  - ◆ Fires planning, targeting, and assessment
  - ◆ Sustainment operations
  - ◆ Protection
- ◆ AI support to special operations
- ◆ AI in information operations
- ◆ Chinese and Russian AI development
- ◆ AI versus AI: countering Chinese and Russian AI
- ◆ AI in training
- ◆ AI in professional military education
- ◆ AI support to human resources/talent management
- ◆ AI in joint or combined operations
- ◆ Ethical considerations: benefits and/or hazards of arming AI platforms

Articles should be prepared in accordance with the *Military Review* Submission Guide at <https://www.armyupress.army.mil/Journals/Military-Review/MR-Article-Submission-Guide/> and submitted no later than 5 January 2024.
